

ALIUS Bulletin Editor Checklist

- Confirm the piece subtype: interview, conversation, podcast, commentary, review, or editorial note.
- Keep the published bulletin look as the visual target, not the working Word-template look.
- Provide a title, abstract, keywords, contributor block, citation block, and running title.
- Keep pull quotes explicit and editor-approved. For interviews and conversations, aim for 2–6 excerpts.
- Use American-English punctuation conventions, straight ALIUS spacing rules, and APA references.
- Check front-matter wording carefully because historical issues differ in small human-edited ways.
- Run the local preflight and validation scripts before publishing a new standardized PDF.
